FAX: (785) 296-5509

Purpose of the Bureau of Water

The Bureau of Water administers programs related to public water supplies, wastewater treatment systems, the disposal of sewage, and nonpoint sources of pollution. Programs are designed to provide safe drinking water, prevent water pollution, and assure compliance with state and federal laws and regulations such as the Clean Water Act and Safe Drinking Water Act.

Adopted Water Quality Standards

State Water Quality Regulations

Note: The files linked below require the Adobe Acrobat Reader® plug-in. For assistance with download, installation, or use of the plug-in, please contact [Adobe Systems, Inc.](#) If you experience a problem with one of our files which you have successfully downloaded, please contact webmaster@kdhe.state.ks.us for assistance. For technical support, contact [Adobe Systems, Inc.](#)

The following regulations represent an electronic facsimile of Kansas Administrative Regulations, promulgated by the Kansas Department of Health and Environment and published by the Kansas Secretary of State. These rules are taken from electronic copies of the printed state regulations which serve as the agency's official rules and regulations. The printed regulations represent the final word in matters of interpretation.

The KDHE Office of Public Information has appended copies of the *Kansas State Register* publication of new or amended, permanent KDHE regulations to the appropriate chapter. Those amendments are noted on the cover sheet for each chapter. In the interest of saving space, some chapters have been grouped together.
